ABOUT ME

I'm a web developer who enjoys solving real problems through code. Over the years, I've worked on various projects — from business applications and mobile apps to custom WordPress sites. I'm most comfortable working with React, Node.js, and modern web technologies, but I am always open to learning new things and working on challenging projects. I love it when my work has real value and contributes to someone's business.

WORK EXPERIENCE

🏢 *Virgin Pulse* – Tuzla

City: Tuzla

Internship

[09/2021 – 03/2022]

- Worked as part of a cross-functional development team.
- Gained hands-on experience with **Angular** for front-end development and **PostgreSQL** for database management.
- Contributed to the development of an **iOS application** using **Xcode** and **Swift**.
- Also assisted in Android app development using **Android Studio**.

🏢 *Imel* – Tuzla

City: Tuzla

Web developer

[04/2022 – 04/2024]

- Built a **Server-Driven UI** system using **SvelteKit**, enabling dynamic form generation based on JSON configurations.
- Developed multiple **custom WordPress websites**, utilizing **Advanced Custom Fields (ACF)** and custom themes to deliver flexible content management solutions.
- Spent over a year working with **React** on a large-scale modular web application.
  - One module handled **business operations** such as vacation tracking, access control, sick leave management, and more.
  - Another module was focused on **Point of Sale (POS)** systems, streamlining in-store transactions.
  - Additionally, contributed to a **warehouse and inventory management** module, where each item was tracked via **QR codes**.
  - The QR scanning functionality was integrated using a **React Native** app and deployed on specialized scanning devices.
- Wrote **end-to-end tests** using **Cypress** to ensure application reliability and catch regressions.
- Involved in **server configuration and production deployment** of web applications.
- Performed **API testing** with **Postman** and contributed to writing clear and maintainable **API documentation**.

🏢 *Freelance* – Tuzla, Bosnia and Herzegovina

City: Tuzla | **Country:** Bosnia and Herzegovina

Web developer

[12/2024 – 03/2025]

- Built custom WordPress websites for clients using Advanced Custom Fields (ACF) and custom themes. Focused on creating clean, responsive, and easy-to-manage websites tailored to specific client needs. Delivered full website solutions – from initial setup and development to deployment and basic SEO optimization.

🏢 *Bingo D.O.O.* – Tuzla, Bosnia and Herzegovina

City: Tuzla | **Country:** Bosnia and Herzegovina

IT engineer

[02/06/2025 – Current]

- Worked on the DMS (Document Management System) program, ensuring its smooth operation and user support.
- Maintained and monitored computer networks and IT systems, ensuring optimal performance and security.
- Developed an internal mail tracking application (*Bingo Posta*) to digitalize the process of sending and receiving internal documents between business units and administration. The system includes features such as QR code scanning, status tracking, and role-based access for drivers and administrators, significantly improving transparency and efficiency.

EDUCATION AND TRAINING

IT engineer
EU "Kallos" Tuzla

City: Tuzla | **Website:** https://eukallos.edu.ba/ | **Field(s) of study:** Information and Communication Technologies | **Type of credits:** ECTS | **Number of credits:** 240

Relevant coursework: Web Development, Software Engineering, Databases, Algorithms, Operating Systems

Professional Development

Self-taught web development, specializing in JavaScript, React, Node.js, and modern front-end tools through online resources, tutorials, and community contributions. Continuously improving skills by working on personal and freelance projects, including recent work on **QA automation testing** (Selenium, Python) and a **Python-based web scraper** for extracting and organizing data from Korpa.ba into Excel. My code is publicly available on GitHub.
